

AAHCI LAC Regional Meeting *Health & Safety Protocol*

The meeting host institution determines health and safety measures for in-person AAHCI regional meetings and events. Health and safety measures are subject to change, and updates will be reflected on this page.

At the **AAHCI 2022 LAC Regional Meeting**, hosted by the University of São Paulo's Faculty of Medicine (FMUSP) in São Paulo, Brazil, on June 22-23, **all attendees will be required to complete a health and safety acknowledgment form** as part of the registration process on-site. Noncompliance may result in cancellation of registration or removal from the event, with or without a refund.

Health and safety measures include but are not limited to:

- Recommended to **receive the Yellow Fever vaccine 10 days prior to travel** per the [CDC and local guidelines](#).
- **Proof of vaccination (2 doses minimum) upon presentation on your first day** at the meeting location of the University of São Paulo's Faculty of Medicine (FMUSP).
- The **use of masks in all common areas of the campus and meeting location** of the University of São Paulo's Faculty of Medicine (FMUSP).
- Enhanced sanitization of meeting space and sanitizing stations throughout the meeting space.

Travel guidelines

As of April 6, 2022, **Foreign and Brazilian travelers that are vaccinated are exempt from testing for COVID-19**, and arrival quarantine is no longer required when traveling to Brazil. However, they must **present to the airline, before boarding, a proof of vaccination, either printed or electronic**.

Please check your airline company's requirements as they may insist on proof of a **negative or non-detectable test for Covid-19**, such as:

- antigen test (performed within 24 hours before departure); or
- RT-PCR laboratory test (performed within 72 hours before departure).
- In the case of flights with connections or stopovers where the traveler leaves the restricted area of the airport, in which the traveler performs migration, and that exceeds 72 hours since the RT-PCR test or 24 - hours of antigen test, the traveler must submit documentary evidence of a new test.

Note that this document is iterative and subject to change as AAHCI collaborates with FMUSP to ensure an efficient process of hosting this in-person LAC Regional Meeting.
