Association of Academic Health Centers (AAHC) AND

Association of Academic Health Centers International (AAHCI)

Advancing health and well-being through the vigorous leadership of academic health centers

www.aahcdc.org
AAHC and AAHCI support their members as they educate the next generation of health professionals, conduct biomedical research, and provide patient care. Improving the health and well-being of the communities that members serve depends on the continuous advancement, alignment, and optimization of each element of this three-part mission.

The association’s mission is to lead its members as they transform, adapt, and thrive in the changing healthcare landscape—including thought leadership, programs, policy development, advocacy, meetings, publications, and research and analytics.

The Association:

- Works with key decision-makers at academic health centers. AAHC and AAHCI programs and policies are responsive to the senior leadership of its members.
- Represents more than medicine. AAHC and AAHCI are the only organizations with a mission that encompass all health professions schools within member institutions, as well as hospitals owned by or affiliated with academic health centers.
- Is a nimble and member-driven organization. AAHC and AAHCI recognize and respond to pressing issues that are challenging academic health centers and their leaders.
- Offers management and mission support. AAHC and AAHCI assist leaders in making operational decisions that impact institutions’ current activities and long-range strategies.
- Provides individualized leadership support. A range of services from peer-to-peer queries, comparative institutional surveys, and personal, confidential access to the President/CEO are available to members.
- Is global. Regular regional meetings are held around the world, and all members are invited to learn, network, and build new collaborations. An evolving network of Regional Offices extends the reach of the Association.
Meetings, Conferences, and Online Programs
Meetings with leaders in-person and online, both in the United States and internationally.

Publications and Resources
- **Leadership Perspectives**: Commentaries and insights addressing important “on the ground” issues by peers and selected experts
- **Key Perspectives for Academic Health Center Leaders**: Research and analysis focusing on select topics of interest to senior leaders
- **Nota Bene**: In-depth view of real-time concerns intended to be forward-thinking and thought-provoking
- **Additional resources**: Unique data and analyses specific to academic health centers, including: Annual Salary Survey; Leadership Recruitment; Clinical Trials Administration; Social Determinants of Health; Member Profile Survey; and Global Programs

**Advocacy**
AAHC and AAHCI advocate and represent the unique interests and needs of academic health centers to policy leaders, news media, and thought leaders.

**Programs**
- **Aligned Institutional Mission (AIM) Program**: Assists members in developing and implementing institution-specific strategic goals for the alignment of education, patient care, and research
- **Regional Offices**: International offices bring together academic health centers and systems within their region and provide valuable insight on the key issues and challenges they face.
- **Improving Community Health**: Members share best practices and work to incorporate the social determinants of health into the mission of their institutions.
- **Thought Leadership Institute**: Brings together the senior leadership of academic health centers with topical experts to address the deeper issues impacting academic health centers in the challenging 21st century environment

**Networking and Personal Connections to Leaders**
AAHC and AAHCI represent a global network of academic health center leaders that facilitates opportunities to build new relationships, consultations, partnerships, and collaborations.
WHAT IS AN ACADEMIC HEALTH CENTER?

An academic health center encompasses all the health-related components of universities. It has, or has among its partnership, a school of medicine, one or more other health professions schools and/or advanced medical research programs, and a relationship to one or more teaching hospitals or health systems.

1. Research:
   Academic health centers develop new medical technologies, treatment protocols, and innovative biomedical discoveries that benefit millions of people worldwide.

2. Health Professions Education:
   ✓ Build global education collaborations
   ✓ Cultivate workforce diversification
   ✓ Train the next generation of health professionals

3. Patient Care:
   Provide comprehensive, primary, and advanced specialty care

Serve on the frontline in response to:
- PUBLIC HEALTH OUTBREAKS
- NATURAL DISASTERS
- REGIONAL CRISSES
